

Monthly Newsletter

Smart drafting, BIM and AECO services with your standards, hitting all targets: costs, lead times, and quality.

Team Alignment and Capacity Planning

Our project teams resumed work in January with continuity and focus. Active projects continue without interruption, supported by the same teams, workflows, and coordination processes our clients rely on.

January is also a key period for internal alignment. Our teams are reviewing schedules, coordinating across disciplines, and planning capacity to support upcoming milestones throughout the first quarter. This proactive approach allows us to remain responsive while maintaining reliable delivery across all active projects.

Partner Collaboration: Hawaii Architectural Sales

We were pleased to welcome Gene Rooney from Hawaii Architectural Sales to our offices. Collaborating with our partners, exchanging valuable feedback, and continuously improving our processes are key parts of our approach.

Introducing 4G Back-Office Services

4G now offers Back-Office Services, providing fast-track access to qualified operational talent that improves efficiency, lowers costs, and integrates with your workflows across process optimization, executive support, accounting operations, and marketing analytics.

Something you may not know about 4G Architecture

As 4G Architecture grows, we've expanded our team to meet increasing project demands. Today, 320+ architects and engineers support our clients, allowing us to scale resources while maintaining quality, continuity, and close collaboration.

Celebrating a Strong Year and a Strong Team

At the end of last year, our team came together to celebrate the dedication, collaboration, and commitment behind every project delivered in 2025. With local culture, music, and a great atmosphere, we recognized not only the year that passed, but the strength of the team moving forward.

We start this year connected, motivated, and aligned, ready to continue supporting our clients with the same level of care and professionalism.
